ITEM (Cited Documents etc. Reference List of Cited Documents etc.)

- Regarding Claim 6
- Cited Documents 1 and 2
- Remarks

Cited Document 1 describes (see particularly page 23, lines 2 to 11) a control whereby the message, which is displayed after a new message is received, is a message displayed just prior to display of the new message. And, Cited Document 2 describes (see particularly page 2 right-hand top column lines 1 to 3), where a message is received when a stored message is being displayed, the interruption of the stored message and display of the new message. Accordingly, in Cited Document 1, where a message is received when a stored message is being displayed, the configuration of the invention of the present application, being a configuration in which a stored message is interrupted and a new message displayed as in Cited Document 2, is simple to devise for someone skilled in the art.
